

Bi-Office

BioFusion Revolving Whiteboard

Double-sided board with biocomposite details

Description

The BioFusion Mobile Revolving Magnetic Whiteboard is a versatile solution for offices, classrooms and collaborative spaces. With a double-sided rotating surface, you can prepare content in advance and reveal it when needed.

Choose between a lacquered steel option for frequent use (10-year warranty) or a premium ceramic option for intensive use (25-year warranty). Both are easy to clean, offer smooth writing and work with magnets to display notes or documents. All plastic components are made from bivalve shell-based biocomposites, giving the board a distinctive appearance while maintaining strength and durability.

A robust natural aluminium frame keeps it lightweight yet stable, while 4 locking castors make it easy to move. The extra-wide adjustable pen tray provides convenient storage for your writing accessories. Perfect for schools, training centres, offices and meeting rooms, this board combines practicality with contemporary design.

Features

Shell-based biocomposite connectors with a contemporary, textured finish

Double-sided surface rotates on a horizontal axis for large visual communication

Magnetic dry-wipe surface for frequent use, or premium scratch-resistant ceramic for intensive use

Lightweight yet sturdy aluminum frame with biocomposite connectors

Four locking castors for easy mobility

Extra-wide adjustable marker tray for accessories

BioFusion Revolving Whiteboard

Double-sided board with biocomposite details

Integration and compatibility

Compatible with all drywipe markers and magnets.

Personas

Business Professionals

Individuals engaged in meetings, strategy sessions, and collaborative presentations benefit from the revolving whiteboard to quickly switch between prepared content and spontaneous notes. Its double-sided design and mobility make it ideal for dynamic professional settings.

Teachers and Trainers

Educators and trainers can rely on the revolving board to present structured lessons on one side while keeping space for interactive exercises on the other. It encourages participation by allowing students to contribute ideas, diagrams, or notes directly on the surface.

Event Planners and Presenters

For conferences, workshops, and events, presenters can use the board to alternate between pre-prepared information and live interaction with the audience. Its mobility and double-sided format provide flexibility for displaying schedules, maps, or brainstorming outcomes.

Group Coordinators and Team Leaders

Leaders managing workshops, group activities, or project planning sessions can maximize interaction with the revolving function. Participants can write, review, and track progress, ensuring collaborative input is clearly visible to everyone.

Customer service and support

Our customer service and support team is always ready and available to provide prompt assistance, expert guidance, and effective solutions to address any customer inquiries or concerns.

Customer feedback

"The revolving function makes meetings so much smoother! I can keep prepared notes on one side and still have plenty of space for brainstorming. The contemporary design is a big plus."
Daniel R.

BioFusion Revolving Whiteboard

Double-sided board with biocomposite details

Benefits	Versatility: The revolving double-sided surface provides continuous space for writing and displaying content, allowing users to switch seamlessly between pre-prepared notes and live brainstorming.
	Portability: Built with a lightweight yet sturdy aluminium frame and 4 locking castors, the board can be moved easily between spaces, offering reliable stability wherever it's placed.
	Interactive Collaboration: Ideal for fostering group engagement, the board enables participants to contribute directly, whether in training sessions, meetings, or creative workshops.
	Reusability and Sustainability: Both lacquered steel and ceramic surfaces are highly durable, designed for long-term frequent use. Combined with shell-based biocomposites, the board reduces reliance on traditional plastics while promoting sustainable practices.
	Biocomposite Materials: Crafted from biocomposite materials combining bivalve shell material with advanced polymers, these revolving whiteboards combine strength, durability and a contemporary design without compromising on performance.
Availability and shipping	Product available; Lead Time: 3 weeks
Additional information	The drywipe surface is characterized by its ease of cleaning using a microfiber cloth, an eraser or a suitable whiteboard spray. In addition, its resistant surface ensures that no writing residue remains, even after prolonged use.
